FCC COMMENTS REGARDING MB 18-184

My name is Warren Lee, and I am the owner and General Manager of WHLJ-FM in Valdosta, Georgia.

I am in full support of the MMTC AND SSR Communications FM Class C4 / 73.215 proposal to allow eligible Zone II Class A stations to upgrade in power from 6000 Watts to 12,000 Watts.

The FCC asks if minority owned stations would benefit from this proposal. We will.

We are now in our twenty first year serving the Echols County Statenville, Georgia Area. In our coverage area we have assisted thousands in making them aware of inclement weather.

We have and continue to assist our area schools with back to school supplies, assist the One Hundred Black Men Annually with their Bar B Que Cook Off. The funds raised from the Cook Off assist hundreds of under privilege student with scholarships.

We also have assisted and continue to assist the 100 in feeding the hungry. We also assist the Echols County Statenville Child Advocacy Annually in helping children and adults.

We also have and continue to assist all of our Non Profit Organizations in getting the word out to the community with programs that assist the community. WHLJ-FM is also a big supporter of My Brother's Keeper Ministry, that assist individuals in need of help.

Please implement this proposal now. This is the exact relief that we need.
